

Pearl antigraffiti - 60

Pearl, pre-painted galvanized steel of a 60µm thick PVDF fluoridated thermoplastic multilayer paint applied at high temperature. Pearl offers pearly hues for a play of light and colors. The facade seems to change color according to the angle of view.

- Excellent resistance to ultraviolet radiation due to the atomic structure of fluoropolymers
- Enhanced resistance to contamination and external deterioration thanks to the protective anti-graffiti varnish layer
- Recommended for prestigious buildings, Pearl is a coating with exceptional durability
- Pearl is available in various shades of colours including always pearl grey in one view angle
