

## Globalroof® IN 210 Etna

IN 210 Etna is a thermal-acoustic flat roof system made of roof deck with a minimum steel thickness of 0.75mm and Epsitoit insulation offering medium sound insulation.

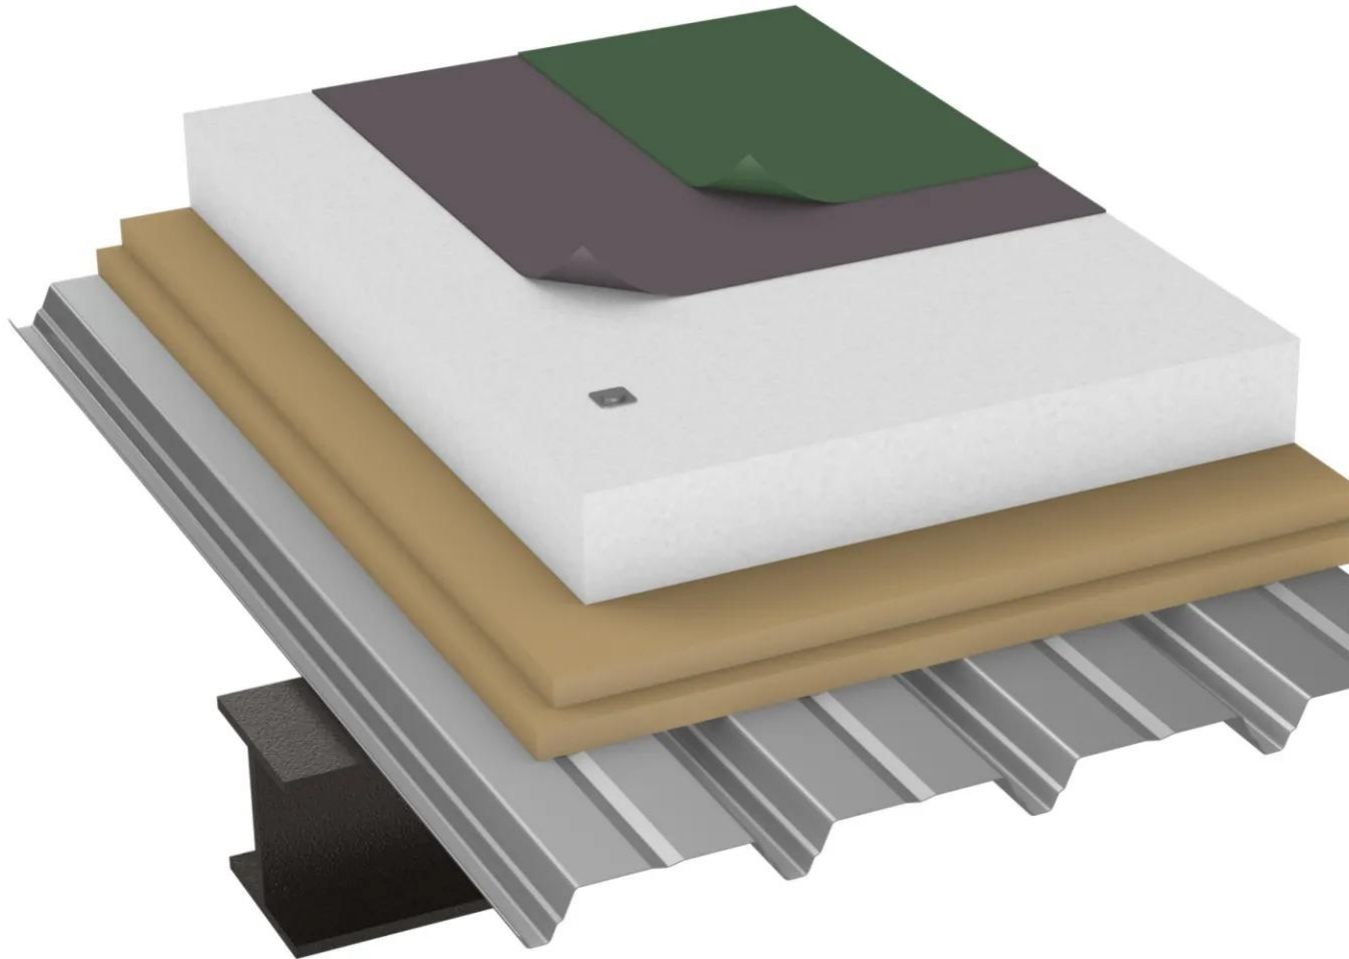

Composition :

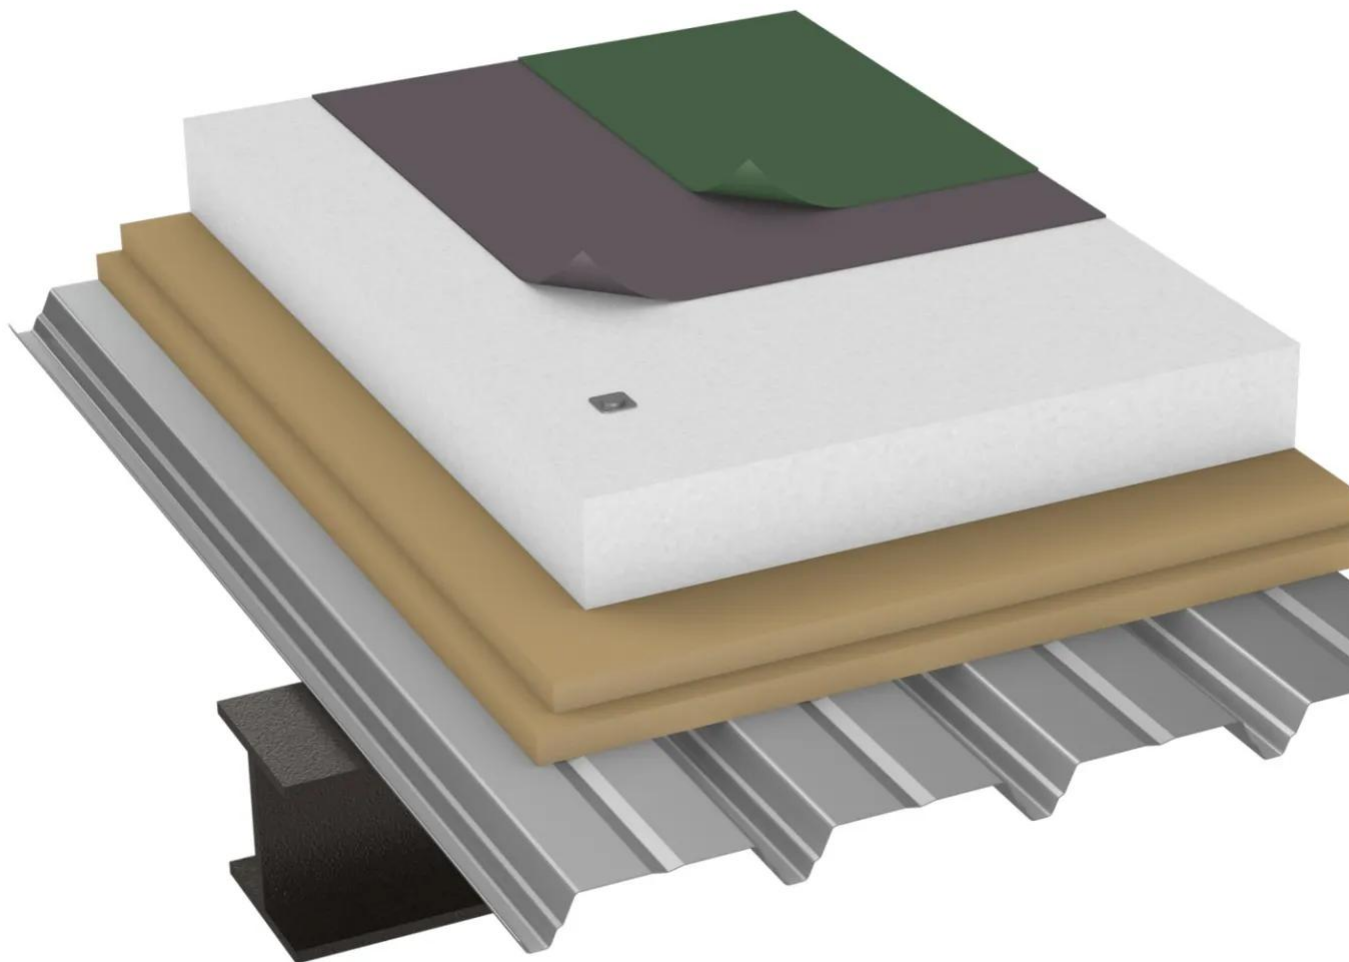

- Roof deck Hacierco 40 SR in thickness 0.75mm
- Mineral wool with rabbet joint Protect LRB 60mm thick
- PSE Epsitoit 20, 110mm thick
- Multi layer bituminous waterproof membrane (Soprema)

Performances and characteristics :

- Sound reduction index  $R_w(C;Ctr) = 36(-1;-6)$  dB
- Thermal transmittance  $U_p = 0.23W/m^2.K$  estimated
- Weight:  $25kg/m^2$
- Spacing: 22cm
