

## Globalroof® SE 15

SE 15 is a flat roof system made of steel deck .The especially designed profile makes the insulation fixations not visible and so offers a nice ceiling. The system provides an Up of 0.15W/m².K.

Composition :

- Roof deck Hacierco, thickness according span and loads
- Mineral wool 250mm total thickness ( $\lambda = 0.037\text{W/m.K}$  maximum and fixations with thermal break)
- Multi layer bituminous or PVC waterproof membrane

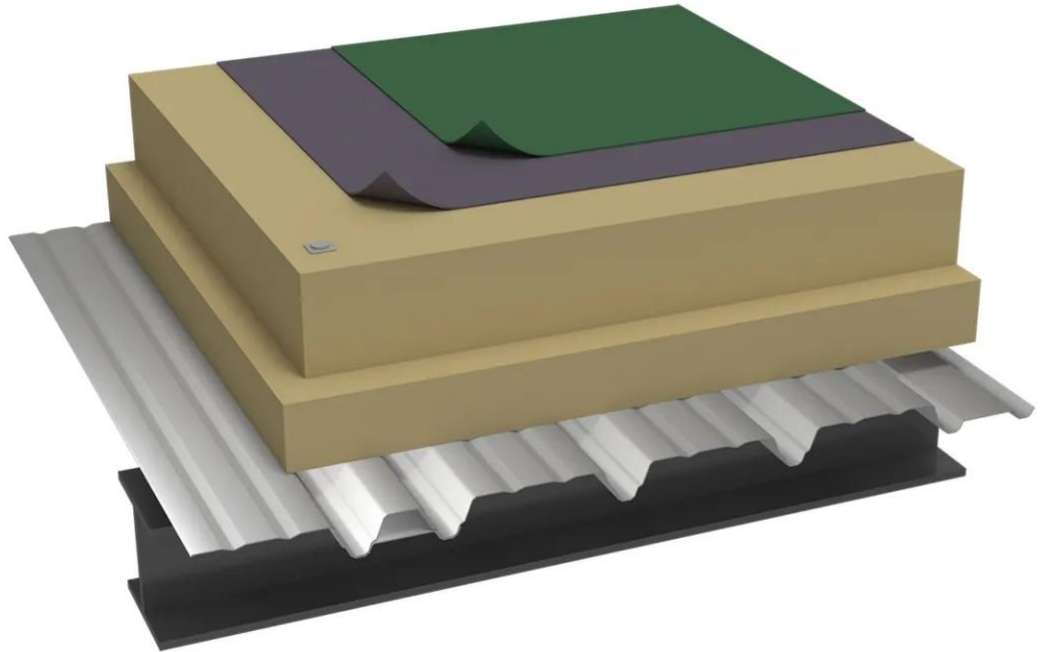

Performance :

- Thermal transmittance Up = 0.15W/m².K estimated
