

Hacierco® 4.256.38

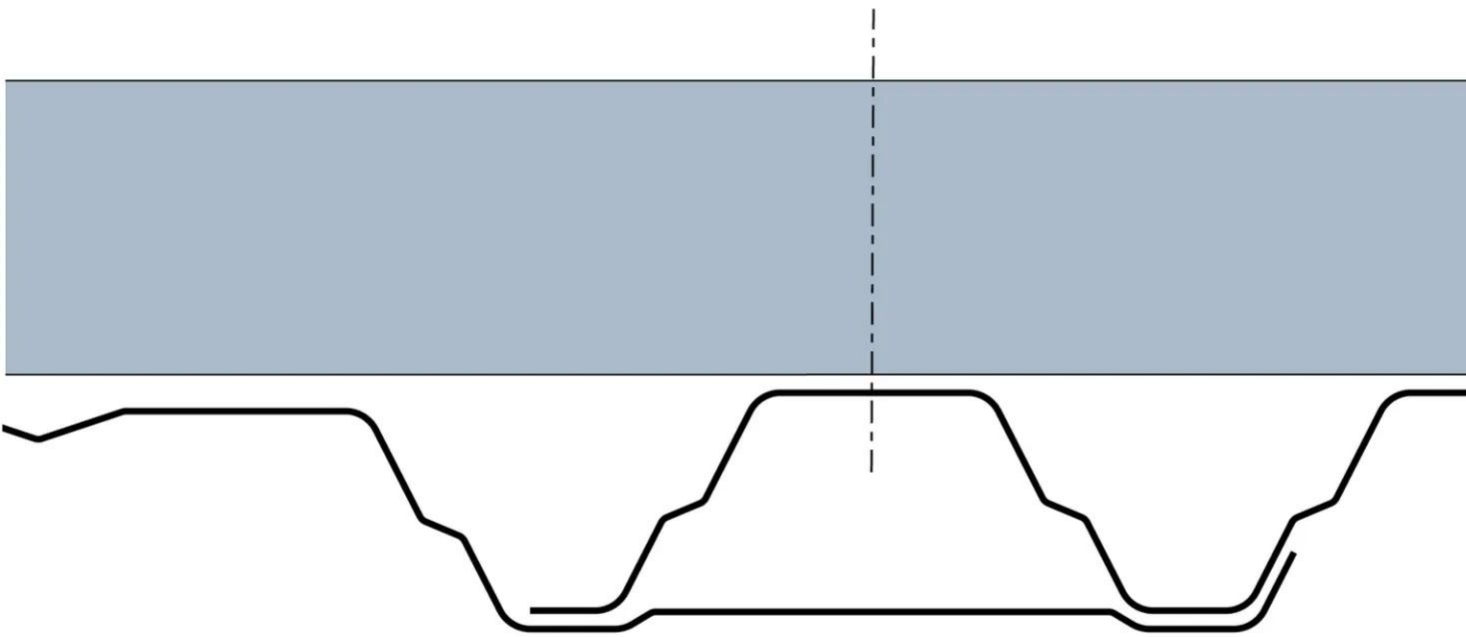

This roof decking profile stands out for its concealed insulation and sealing fixings on the soffit. It features a cover width of 880 mm, a height of 38 mm and a valley opening of 70 mm. Its top flange can be perforated (Hacierco C38P) for a better acoustic performance.

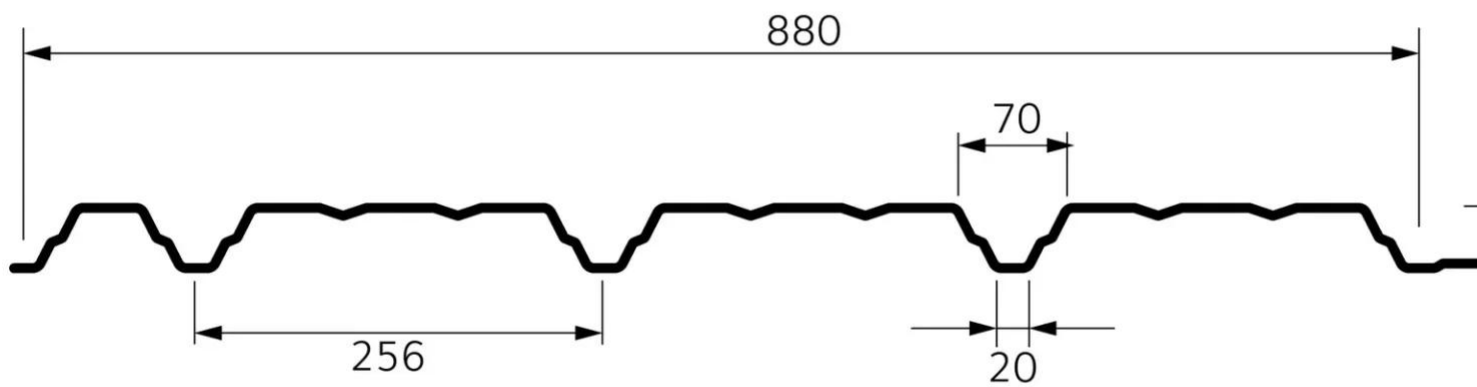

- Enhanced aesthetic through invisible fastenings of insulation and sealing from below
- 4 thicknesses of steel available, from 0.75 mm to 1.25 mm, in solid or perforated version
- Span up to 3.15 m in solid version 0.75 mm
- Maximal length 15 000 mm
