

Promisol® V iQ+

This wall sandwich panel belongs to the iQ+ System® range that has been designed to improve the energy efficiency of buildings and their environmental footprint. It is made of an iQ+ polyisocyanurate (PIR) foam and two prepainted steel facings. Its external facing is available in ribbed, micro-ribbed or smooth finish.

- Standard cover width: 1 150 mm
- Insulating core material: iQ+ System®
- Declared thermal conductivity λ : 0.020 W/m.K
- Excellent airtightness thanks to the nesting and joints system minimizing thermal bridges
- Standard thickness of facings: External side 0.60 mm/Internal side 0.40 mm
- 7 thicknesses of insulation core available, from 80 to 200 mm
- Vertical or horizontal installation
- Visible fixings
