

## Eclectic® 9.61.30

Eclectic® 9.61.30 is an asymmetric wall profile made of prepainted steel inspired by the code barre effect, it has a height of rib of 30mm.

- Asymmetric geometry
- Can be associated to Eclectic 7.35.50 and Eclectic 7.61.50 (if no metallic color)
- Vertical and horizontal installation (prefer vertical installation to avoid higher fouling)
- Thickness 0.63 mm or 0.75 mm
- Maximal length 7,500 mm for horizontal installation and 10,000 mm for vertical installation
- Available in a wide range of colors and sustainable, design and technical organic coatings
- Realizable in Touch Gloss, Touch 2B & Touch Top stainless steel in thickness 0.80 mm and lengths from 2 m to 6.50 m
- Several types of perforation available for a use as sun screen: [contact us](#)
