

## Etnic

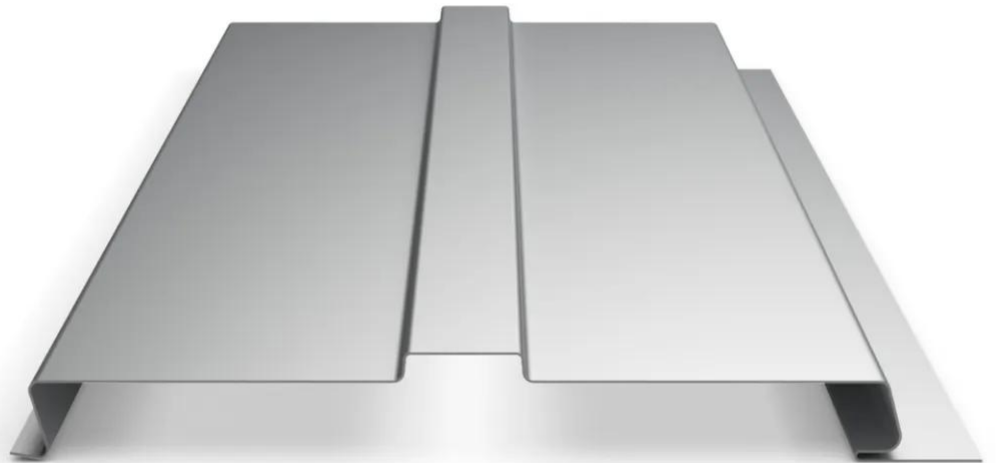

Etnic is a range of 6 sidings with differentiated geometries whose association makes it possible to give the façade a bare code effect. The 95° folding results in a rectangular wave, hence the visual impression of a barcode. Their multiple and unlimited combination makes it possible to give a distinctive character to the façade.

- Validated by CSTB, according to " Cahier N°3747 dated May 2014"
- Can be used on masonry, on twin skin system for new building or for refurbishing
- Rain screen system
- Installation on seismic area
- Fire: incombustible
- Pre-painted steel, stainless steel 1 mm, aluminium 1.5 mm
- Secret fixings
- Vertical and horizontal installation
- Six types of siding can be associated together:
  - Etnic type C
  - Etnic type CD
  - Etnic type D
  - Etnic type GCD
  - Etnic type GC
  - Etnic type G
  - Can be used with ST300 type HZ and ST600 Evolution type HZ
- Maximal length 2900 mm
- Perforation possible on request
- Other widths and geometries possible on request
