

Globalwall® IN 600i

IN 600i is a double skin system with an inner structural tray and an external weather steel profile of minimum 0.75mm vertically lead giving good sound insulation and a thermal Up estimated value of 0.23W/m².K.

Composition

- Hacierba Tray 1.600.150 VK in thickness 0.75mm
- Cladipan 32-thickness 210mm
- Wall cladding profile Trapeza. Frequence or Oceane with a steel thickness 0.75mm

Performance and characteristics

- Sound reduction index $R_w(C;Ctr) = 49(-3;-10)$ dB
- Thermal transmittance $U_p = 0.23W/m^2.K$ estimated
- Weight: 23kg/m²
- Spacing: 21cm .not including the height of the external weather profile
