

Eklips R

Our Eklips R 39 and Eklips R 45 steel profiles are validated for use with Renusol's MS+, MS+P and MS+H fastening systems.

Eklips R 39 and Eklips R 45 profiles are compatible with the technical evaluations made by Renusol.

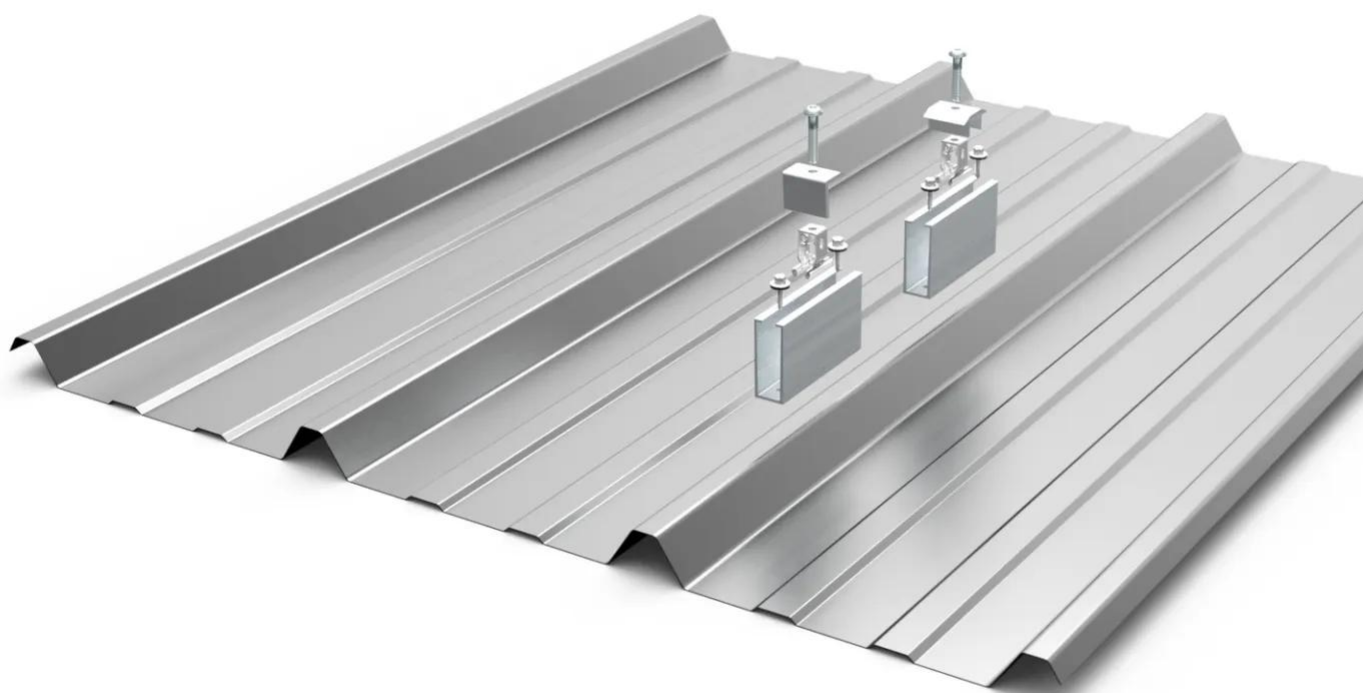

- Landscape installation with MS+, portrait installation with MS+P and a high-top installation favouring ventilation for MS+H.
- Self-tapping screws secure the mounting system directly to the metal roof. Pre-drilling is not required and there are no fillings to be removed.
- The compact construction system reduces transport costs, saves storage space and eases handling on site.
- The simple system allows for quick and easy assembly.
